

Automotive Coaxial Speaker

This high-performance coaxial speaker is designed for automotive audio systems. It features a robust construction and delivers clear, powerful sound reproduction across a wide frequency range.

Product Overview

High-Performance Automotive Audio

This high-performance coaxial speaker is engineered specifically for demanding automotive audio environments. Featuring a robust construction, it delivers clear, powerful sound reproduction across a wide frequency range to enhance the in-vehicle listening experience. The integrated design combines a dedicated woofer for deep low-frequency response and a tweeter for crisp, detailed high frequencies, ensuring professional-grade audio quality.

Technical Specifications

Speaker Configuration	Coaxial (Integrated Woofer and Tweeter)
Installation Compatibility	Universal Fit, Easy Installation, Automotive Standard
