Product Overview

High-Efficiency Crankcase Oil Separator

This automotive crankcase oil separator is engineered to efficiently remove oil from crankcase gases, significantly reducing oil consumption and enhancing overall engine efficiency. Featuring a robust, durable construction with internal baffling and filtration, it minimizes oil carryover into the intake system. Designed for reliable performance and easy installation, this unit meets or exceeds OEM specifications for durability and long-term operation.

Technical Specifications

Quality Standards

ISO/TS16949:2009 • OEM Equivalent

Minimum Order Quantity

200 pcs

Key Features

High Efficiency, Long Working Life, Temperature Resistant, Environmental Friendly

Ordering & Logistics

Production Lead Time

5 days

Sample Time

30 days
