

Automotive Dashboard Trim Bezel

This beige plastic component serves as a dashboard trim bezel. It is designed for mounting or housing electronic components within a vehicle's dashboard.

Product Overview

Automotive Dashboard Integration Solution

This automotive dashboard trim bezel is a precisely engineered interior component designed to seamlessly house electronic units and instrumentation. Featuring a durable beige plastic construction, the bezel incorporates a multifaceted layout including a dedicated rectangular opening and a recessed mounting area. Its ergonomic design ensures professional-grade integration within the vehicle's cockpit, providing a clean and finished look for automotive electronic installations.

Physical Attributes

Material	High-grade Automotive Plastic
