

Automotive Diagnostic Scan Tool with Color Display

This automotive diagnostic scan tool is designed for vehicle diagnostics. It features a color display, supports a wide range of vehicles, and performs various diagnostic functions, including reading and clearing DTCs, accessing live data streams, and performing actuation tests.

Product Overview

Comprehensive Diagnostic Capabilities

This advanced diagnostic scan tool is engineered for precision vehicle maintenance and repair. It features an intuitive color display that simplifies navigation and real-time data interpretation for technicians. Equipped with versatile functionality, it supports essential service tasks including diagnostic trouble code management, live data streaming, and specialized reset procedures.

Technical Specifications

Core Diagnostic Functions

- Read and clear diagnostic trouble codes (DTCs)
- Live data stream access
- Actuation tests
- Oil reset
- EPB reset
- Battery registration

System Ports

- To Host
- From Host
- From OBDII
- To ECU
- From ECU

Hardware Features

Color Display, Integrated Printer, Robust Design
