

# Automotive Dual Action Polisher with Variable Speed

This dual action polisher is a versatile tool designed for automotive detailing. It features a disc size ranging from 125-150mm and operates on a rated input power of 900W, delivering a no-load speed of 2600-6800 /min.

## ADDITIONAL IMAGES

## Overview

### Professional Dual Action Polisher

This high-performance dual action polisher is engineered for professional automotive detailing, backed by 15 years of specialized development. It features precision-engineered CNC components, including integrated shaft and teeth, for superior durability and consistent performance. Designed for versatility, it supports multiple eccentricity settings and disc sizes to handle various polishing tasks with ease.

## Performance Metrics

### Rated Input Power

**900 W**

Rated Input Power

### No-Load Speed

2600-6800 /min

### Available Eccentricity

8mm, 12mm, 15mm, 21mm

## Technical Specifications

### Rated Voltage

- 110V/60Hz
- 230V/50Hz

### Disc Size Range

125-150mm

### Speed Settings

6

## Features & Construction

### Build Quality

- CNC machined gearbox and polarizer
- Integrated shaft and teeth
- 20CRMNTI material core components
- Imported bearings

### Ergonomics & Control

- Multi-position D handle
- Infinitely variable speed dial
- Fish scale antiskid rubber grip
- Soft start function

### Maintenance Features

Yes

## Certifications

### Certifications

CE • EMC • SGS • RoHS
