

Automotive Dual Impeller Blower Motor

Dual impeller blower motor designed for automotive applications. It features a cylindrical motor housing with two squirrel cage fans for efficient air circulation.

Product Overview

High-Performance Dual Impeller Blower

This dual impeller blower motor is engineered for robust air circulation in automotive HVAC systems. Featuring a symmetrical dual-fan design, it ensures consistent airflow and reliable performance under demanding conditions. Designed for 24V electrical systems, this unit is an essential component for maintaining optimal climate control within vehicle cabins.

Technical Specifications

Rated Voltage	24 V
Rated Current	8 A
Turn Speed	3500 RPM

Key Features

Design Type	Dual Impeller, Squirrel Cage Fan, Automotive HVAC
-------------	---
