

# Automotive Dual Mirror Assembly

This is a complete rear mirror assembly designed for automotive applications. It features dual mirrors mounted on an adjustable black metal frame.

## Product Overview

### Dual Mirror Assembly for Automotive Use

This professional-grade automotive rear mirror assembly is engineered to provide enhanced visibility and road safety. Featuring a robust black metal frame, the unit integrates a larger rectangular mirror alongside a smaller square mirror for comprehensive coverage. Adjustable mounting brackets ensure flexible installation, making it a reliable solution for various automotive applications.

## Technical Specifications

Configuration	Dual mirror system, Rectangular main mirror, Square secondary mirror
Frame Material	Black metal
Mounting Options	Adjustable mounting brackets

## Compliance

### Safety Standards

Enhanced visibility • Safety-oriented design
