

Automotive Electric Fuel Pump

This electric fuel pump is designed for automotive applications. It features a cylindrical housing with electrical connections and fuel inlet/outlet ports for various fuel delivery systems.

Product Overview

Universal Automotive Electric Fuel Pump

This universal electric fuel pump is engineered for reliable fuel delivery in a wide range of automotive applications. It is manufactured to meet rigorous national standards and undergoes 100% testing to ensure consistent performance. With a flow rate of 100 liters per hour and a pressure rating of 0.2 bar, it provides a dependable solution for various fuel system requirements.

Technical Specifications

Flow Rate	100 L/h
Operating Pressure	0.2 Bar
Application Compatibility	Universal
Part Number	EFP382801E

Cross Reference

Cross Reference Table

Brand	Part Number
Airtex	E8012S

Certifications

Quality Certifications

TUV • ISO/TS 16949:2002 • CE
