

# Automotive Electrical Wiring Harness

This automotive wiring harness is designed for electrical power distribution and signal transmission within a vehicle. It includes color-coded wires, connectors, and protective bundling for organized routing and durability.

## ADDITIONAL IMAGES

## Product Overview

### Professional Electrical Wiring Solutions

This automotive electrical wiring harness is engineered for reliable power distribution and signal transmission in demanding environments. Designed to support both automotive applications and household electrical appliances, the assembly features organized, color-coded wiring and diverse connector types. Each unit is built to ensure durability, organized routing, and protection against environmental factors.

## Compliance & Standards

### Regulatory Compliance

RoHS, REACH

## Technical Specifications

### Voltage Rating

500 V

### Conductor Cross-section

0.75 mm<sup>2</sup>

### Cable Type

H05VV-F

## Design & Construction

### Harness Features

- Color-coded wiring for identification
- Multi-pin rectangular connectors
- Individual terminals and ring terminals
- Bundled and secured with cable ties
- Abrasion-resistant protective wrapping

## Applications

### Primary Industries

Automotive • Household Appliances • Mechanical Equipment • Electrical Equipment
