

Automotive Engine Cooling Radiator

This high-performance radiator is designed for efficient engine cooling. It features a durable core construction for optimal heat dissipation and long-lasting performance.

Product Overview

High-Performance Engine Cooling Solution

This automotive engine cooling radiator is engineered to deliver superior thermal management for heavy-duty bus applications. Designed to meet or exceed strict OEM specifications, it ensures optimal heat dissipation and reliable temperature control even under the most demanding driving conditions. The robust construction promotes engine longevity by effectively preventing overheating and maintaining consistent operating temperatures.

Technical Specifications

Core Dimensions	862*918
Header Plate Dimensions	60*60*953
DPI Reference	A9405001503
Nissens Reference	55012

Compatibility

OEM Reference Number	A9405001503
Compatible Vehicle	SCANIA BUS 04-MT
