

Automotive Engine Oil Pump

This high-quality oil pump is designed for automotive engines to ensure optimal lubrication and performance. Constructed from durable cast iron, it features a precision-engineered gear for optimal oil flow and pressure.

Product Overview

High-Performance Engine Lubrication

This automotive engine oil pump is engineered to deliver reliable lubrication and consistent oil pressure, which is critical for maintaining engine performance and longevity. Designed to withstand high temperatures and pressures, it ensures efficient oil delivery to vital engine components, significantly reducing wear and tear. Built to meet original quality standards, this component is a robust solution for demanding tractor engine applications.

Technical Specifications

OEM Reference Number	4132F051
Part Number	66-AO-0407
Category	Tractor Engine Part

Compatibility

Compatible Engines/Models

- Perkins 3075
- Perkins 4255
- Perkins 6130

Performance Features

Performance Highlights

High Temperature Resistance • High Pressure Resistance • Long Service Life • High Efficiency

Quality & Standards

Certifications	ISO 9001
