

Automotive Engine Oil Pump

This high-performance oil pump is designed for optimal engine lubrication. It delivers consistent oil pressure and flow, ensuring reliable engine performance and longevity for various automotive applications.

Product Overview

High-Performance Engine Lubrication

This automotive engine oil pump is engineered to provide optimal lubrication, ensuring consistent oil pressure and flow for demanding engine environments. Constructed with a robust cast iron housing and precision-machined internal components, it is built for durability and long-term reliability. The unit is designed to minimize engine wear and tear by delivering efficient oil circulation to critical engine parts.

Technical Specifications

Key Performance Features

Consistent Oil Pressure • Optimal Flow Rate • Enhanced Engine Longevity

Construction Materials

Cast Iron Housing, Precision-Machined Components
