

Automotive Engine Water Pump

This water pump is designed for automotive engines. It ensures efficient coolant circulation, maintaining optimal engine temperature and preventing overheating.

Product Overview

High-Performance Engine Cooling Solution

This automotive engine water pump is engineered for reliable coolant circulation, ensuring your engine maintains optimal operating temperatures. Designed as a high-quality aftermarket replacement, it is built with a robust combination of metal and plastic components to withstand demanding conditions. This unit is specifically compatible with FAW X-03 engine cooling systems, offering a dependable solution for maintenance and repair needs.

Technical Specifications

Part Number	1307010-81D
Application	Xichai / FAW X-03
System	Engine Cooling System
Material	Metal and Plastic

Physical Dimensions

Dimensions

270 mm

Length

360 mm

Width

210 mm

Height

Weight

13 kg

Logistics & Quality

Quality Grade

Aftermarket

Packaging

- Neutral Box
- 1 piece per box
