

Automotive Front Shock Absorber

This front shock absorber enhances vehicle stability and ride comfort. It is engineered for optimal damping and responsiveness, providing superior handling and control.

Product Overview

High-Performance Front Shock Absorber

This high-performance front shock absorber is engineered to deliver enhanced vehicle stability and superior ride comfort. Featuring a robust construction with a distinct gold-anodized tube and silver-finished lower section, it is built for durability and long-lasting performance. Designed for optimal damping and responsiveness, this component provides drivers with improved handling and precise control across various automotive applications.

Technical Specifications

Finish Type	Gold-Anodized, Silver-Finished
Application	Automotive Front Suspension

Key Features

Performance Benefits

- Enhanced vehicle stability
- Superior ride comfort
- Optimal damping responsiveness
- Improved handling and control
