Product Overview

Reliable Fuel Delivery Solution

This complete fuel pump assembly is engineered to provide a consistent and reliable fuel supply to the engine, essential for optimal vehicle performance. The unit integrates a precision fuel level sending unit, ensuring accurate readings on the dashboard fuel gauge. Built from robust, high-quality plastic and metal components, this assembly is designed to withstand harsh in-tank fuel environments for long-lasting durability.

Technical Specifications

Included Components

- Fuel pump
- Fuel level sending unit with float
- Fuel filter
- Reservoir

Installation Method

In-tank

Key Features

Fuel injection compatible, Durable construction, Integrated sending unit, Complete assembly

Connectivity

Connection Interfaces

Interface Type	Function
Electrical Connector	Power and signal transmission
Fuel Line Connector	Supply and return
