

# Automotive Glass Identification Reference

Reference guide for identifying automotive glass types and specifications. It includes details on tempered glass, DOT codes, and European homologation numbers found on windshields and windows.

## Product Overview

### Comprehensive Automotive Glass Identification Guide

This reference collection provides detailed insights into automotive glass markings, essential for regulatory compliance and accurate component identification. It covers a wide range of industry-standard identifiers including DOT codes, E-mark homologation numbers, and glass type classifications. Ideal for technical professionals, this guide facilitates the verification of tempered and safety glass specifications across diverse vehicle makes and models.

## Technical Standards

### Glass Classification Codes

AS2 • AS-2M • AS-1

### Compliance & Homologation

DOT-827, DOT-563, E-Mark (E11), E-Mark (E1), 43R-006550, 43R-006512, 43R-001853, 43R-017067

## Technical Specifications

### Light Transmission

**70 %**

Minimum Transparency

### Material Characteristics

- Tempered Safety Glass
- Solar Green Tinting Options
- OEM Specification Grade
