

Automotive Grinding Abrasive Paper

This abrasive paper is designed for polishing paint and varnish. The grain surface is specially treated and can be made into Velcro or PSA discs.

Product Overview

Professional Automotive Abrasive Solution

This automotive grinding abrasive paper features a specially treated grain surface designed for high-performance material removal and surface preparation. It is primarily engineered for the polishing of paint and varnish, ensuring a consistent finish. The material is versatile and can be converted into both Velcro discs and PSA discs to suit various application needs.

Technical Specifications

Grit Rating	P240
Coating Type	Electro Coated

Application & Compatibility

Available Formats

- Velcro Disc
- PSA Disc

Primary Applications	Automotive Grinding, Paint Polishing, Varnish Polishing, Surface Preparation
