

Automotive Halogen Headlight Bulb H7

High-performance halogen headlight bulb designed for automotive applications. Features a robust filament construction for extended lifespan and reliable operation.

Product Overview

High-Performance H7 Halogen Bulb

This high-performance halogen headlight bulb is engineered specifically for automotive applications, ensuring reliable illumination for nighttime driving. Featuring a robust filament construction, the bulb is designed for an extended lifespan and consistent operation. Its quartz glass envelope provides superior thermal stability and vibration resistance, making it a durable choice for demanding driving conditions.

Technical Specifications

Socket Type	H7
Construction Materials	Quartz Glass, Robust Filament

Performance Features

Key Benefits

- Extended lifespan filament design
- Improved visibility for nighttime driving
- High thermal stability
- Vibration resistance

Performance Metrics

1 H7 Socket

Standard Compatibility
