

Automotive Headlamp Assembly

This headlamp assembly provides essential illumination for safe driving during nighttime or low-visibility conditions. It is constructed with durable materials for long-lasting performance and resistance to environmental factors.

Product Overview

Automotive Headlamp Assembly

This headlamp assembly is engineered specifically for 2011 vehicle models, providing reliable illumination for improved safety in low-visibility conditions. It features a complete integrated design with a high-clarity lens, an internal reflector, and dedicated sockets for both high and low beam functionality. Built from robust materials, this component is designed to withstand harsh environmental exposure while serving as a direct OEM replacement part for a seamless fit.

Technical Specifications

Integrated Components

- Clear optical lens
- High-efficiency reflector
- High beam socket
- Low beam socket

Factory Reference Code	wt-29-f-101
Vehicle Model Compatibility	SUNNY/versa 2011

Compliance and Quality
