Product Overview

High-Performance Automotive Heater Core

This automotive heater core is engineered for efficient heat transfer and precise cabin temperature control. Built with durable materials and precision manufacturing, it ensures reliable, long-lasting performance in various weather conditions. Its compact design allows for straightforward installation and seamless integration into existing vehicle cooling systems.

Technical Specifications

Core Dimensions

330 mm
Length

173 mm
Width

42 mm
Depth

Design Features

- Integrated inlet and outlet pipes
- Protective end caps for shipping
- Precision-machined metallic surface
- Integrated perimeter gasket seal

Reference Identification

6281016
