

Automotive Heater Core

The automotive heater core is a radiator-like device responsible for providing heat to the passenger compartment. Hot coolant circulates through the core, and a fan blows air across its fins to deliver warm air through the vents.

Product Overview

High-Performance Heater Core

This automotive heater core is engineered for efficient heat transfer and reliable operation within vehicle heating systems. Constructed with durable, corrosion-resistant materials, it ensures long-lasting performance and consistent cabin warming. Its compact design allows for straightforward installation and optimal fitment across a range of Audi models, providing a comfortable driving experience in cold weather.

Technical Specifications

Core Dimensions	141*291*26 mm
OEM Reference Number	4F0819031B
Nissens Number	6291002

Vehicle Compatibility

Compatible Vehicles

Vehicle Model	Model Years
Audi A6 Avant (4F5, C6)	2005-2011
Audi A6 Allroad (4FH, C6)	2006-2011
Audi R8	2007-2015
