Product Overview

High-Efficiency Thermal Performance

This automotive heater core is engineered for superior heat transfer and reliable cabin climate control. Constructed with corrosion-resistant materials, it ensures long-lasting operation even under extreme temperature and pressure conditions. Its precise design allows for seamless integration with existing automotive cooling systems, facilitating easy installation and consistent performance.

Technical Specifications

Core Size	168 × 180.5 × 32 mm
OEM Part Number	P96190674
DPI Number	76502
Nissens Reference	6284004

Compatibility

Compatible Vehicle Models

- Daewoo Lanos Saloon
- Daewoo Nubira (KLAJ)
- Daewoo Nubira Wagon (KLAJ)
- Daewoo Leganza (KLAV)

Model Years	1997-2004
-------------	-----------
