Product Overview

High-Performance Automotive Heater Core

This automotive heater core is engineered for efficient heat transfer and reliable performance within vehicle climate control systems. Designed with durable materials to withstand extreme temperatures and pressures, it ensures consistent and comfortable cabin heating. Its compact construction allows for optimal airflow and straightforward installation, making it an essential component for maintaining vehicle interior comfort.

Technical Specifications

Core Dimensions

158 mm

Width

226 mm

Length

26 mm

Thickness

OEM Reference Number

97138-3S000

Reference Part Number

6270086

Compatibility

Compatible Vehicle Models

Make/Model	Year Range
Hyundai Sonata VI (YF)	2009 - Present
Kia Optima	2010 - Present
