

Automotive Heater Core

This heater core is designed for efficient heat transfer in automotive heating systems. It features durable, corrosion-resistant materials to ensure reliable performance and a long lifespan.

Product Overview

High-Efficiency Thermal Management

This automotive heater core is engineered for optimal heat transfer and reliable performance in cold weather conditions. Featuring a robust construction with precision-engineered fins, it ensures maximum surface area for efficient heating. Designed to meet or exceed original equipment specifications, it offers a durable solution for automotive heating systems with easy installation characteristics.

Technical Specifications

Core Dimensions

195 mm

Length

159 mm

Width

42 mm

Depth

Compatibility & Reference

Attribute	Value
Make	FORD
TS Number	6278112
Nissens Reference	6278112

Construction

Material Features

Corrosion-resistant, Aluminum construction, High-performance
