Product Overview

High-Performance Automotive Heater Core

This automotive heater core is engineered for efficient heat transfer and reliable cabin climate control. Designed to withstand extreme temperatures and pressures, it ensures consistent performance in demanding conditions. Its compact, radiator-like construction facilitates optimal fitment and efficient airflow for maximum passenger comfort.

Technical Specifications

Core Dimensions

264 mm
Length

161 mm
Width

26 mm
Thickness

OEM Reference

9995

TS Number

6279042

Compatibility

Compatible Car Models

LESABRE, AURORA, BONNEVILLE

Model Years

2000-2005
