

Automotive Heater Core

This heater core is designed for efficient heat transfer and reliable operation in automotive heating systems. It is constructed with durable materials to withstand extreme temperatures and pressures.

Product Overview

High-Performance Automotive Heater Core

This automotive heater core is engineered for efficient heat transfer and reliable operation within vehicle heating systems. Built with durable materials designed to withstand extreme thermal and pressure conditions, it ensures consistent cabin comfort. Its compact, precision-engineered design allows for straightforward installation and optimized airflow.

Compatibility & Specifications

Core Dimensions

150 mm

Width

206.5 mm

Length

Vehicle Compatibility

Honda Civic 1.5T 2016

OEM Reference

716B-TBA0-A100-M1
