Overview

High-Efficiency Automotive Heater Core

This automotive heater core is engineered for optimal heat transfer and reliable operation within vehicle HVAC systems. Featuring a durable construction with high-quality materials, it is designed to withstand extreme temperature and pressure conditions. The unit includes densely packed fins to maximize surface area, ensuring consistent cabin heating performance during cold weather.

Technical Specifications

Core Dimensions

169 mm
Length

161 mm
Width

26 mm
Thickness

OEM Reference Number

OK2A1.61.A10

Compatibility

Vehicle Fitment Details

Vehicle Model	Model Years
KIA SHUMA Saloon	1996-2001
KIA SHUMA II Saloon	2001-2004

Construction

Construction Features

Aluminum Core, Brazed Aluminum Tubes, High Thermal Conductivity, Durable Fin Design
