Product Overview

High-Efficiency Automotive Heater Core

This high-performance heater core is engineered for optimal heat transfer within automotive HVAC systems. Featuring a compact, durable design, it is constructed to facilitate efficient warmth distribution to the passenger compartment during cold weather. The unit is built to meet strict OEM specifications, ensuring reliable, leak-free operation and long-lasting durability for various vehicle applications.

Technical Specifications

Core Dimensions

220 mm

Length

135 mm

Width

26 mm

Depth

Compatibility & OEM

Attribute	Value
OEM Reference	8710708010
DPI Reference	93033

Construction Features

Aluminum Core, Corrugated Fin Design, Compact Design, Leak-Resistant Connections
