

Automotive HID Xenon Headlight Bulb

High-intensity discharge (HID) Xenon headlight bulb designed for automotive lighting systems. It produces a bright, white light output for improved visibility and safety during nighttime driving.

Product Overview

High-Performance HID Xenon Lighting

This High-Intensity Discharge (HID) Xenon headlight bulb is engineered for automotive lighting systems, providing superior illumination compared to traditional halogen alternatives. The gas-filled glass capsule design ensures a bright, white light output, significantly enhancing visibility and safety during nighttime driving conditions. Designed for reliability and ease of use, this bulb integrates seamlessly into compatible HID vehicle systems.

Technical Specifications

Technology

Gas-filled capsule • High-Intensity Discharge

Light Source

HID Xenon

Installation & Compatibility

Operational Requirements

- Requires compatible HID lighting system
- Requires external ballast for operation
- High voltage operation
