

Automotive HVAC Heater Core

High-performance heater core designed for efficient heat transfer in automotive HVAC systems. It features a durable aluminum construction with optimized fin density for maximum surface area and heat exchange.

Product Overview

High-Performance Automotive Heater Core

This automotive HVAC heater core is engineered for efficient heat transfer and consistent cabin temperature control. Constructed from durable aluminum with optimized fin density, it maximizes surface area for superior thermal conductivity. Designed for a precise fit, it ensures reliable operation and seamless integration with standard vehicle coolant systems.

Technical Specifications

Core Dimensions

170 mm

Width

232.5 mm

Height

26 mm

Depth

OEM Part Number

6448.S4

Cross Reference Numbers

6288013, 73992, 71162

Compatibility

Vehicle Application

Make/Model	Year Range
Peugeot RCZ	2010-2015

Construction

Material

Aluminum

Design Features

- Optimized fin density for maximum heat exchange
- Integrated inlet and outlet connections
- Durable frame for structural support
