

Automotive Inspection Camera with Articulating Probe

This handheld inspection camera is designed for automotive repair and diagnostics. It features a flexible, articulating probe with a camera at the tip, allowing users to visually inspect hard-to-reach areas.

Product Overview

Professional Automotive Inspection Camera

This handheld inspection camera is engineered for precise automotive diagnostics and repair. Featuring a flexible, articulating probe, it allows technicians to easily navigate hard-to-reach areas like engine cylinders, dashboards, and body panels. The integrated color LCD screen provides real-time, clear visuals, while the ergonomic, battery-powered design ensures comfort and portability during extended diagnostic sessions.

Technical Specifications

Probe Type	Flexible Articulating
Water Resistance	Yes
Display	Integrated Color LCD

Features & Control

Design Features

- Ergonomic handle for comfortable grip
- Portable handheld design
- Suitable for extended inspections

Power Source	Battery-powered
Adjustable Settings	Brightness Control, Image Rotation

Applications

Typical Applications

Engine Cylinder Inspection • Dashboard Diagnostics • Body Panel Access • Wet Environment Inspection
