

Automotive Intercooler for Turbocharged Engines

This high-performance intercooler efficiently cools compressed air from turbochargers, enhancing engine performance. Its durable construction ensures optimal heat transfer and reliable operation.

Product Overview

High-Performance Automotive Intercooler

This high-performance intercooler is engineered to efficiently cool the intake air charge for turbocharged engines, significantly increasing air density and engine power. Designed for optimal heat dissipation and minimal pressure drop, it ensures consistent performance and reliability under demanding driving conditions. This unit is built with durable materials to provide enhanced horsepower and torque gains while reducing the risk of engine knock.

Compatibility & Fitment

Compatible Vehicle	HIGHLANDER 2.0T
Model Year	2015
OEM Reference	16550-0V010

Technical Specifications

Core Dimensions	675 * 466.5 mm
Tank Dimensions	31.5 / 31.5 * 482.5 mm
Reference Codes	NISSENS 56149
