

Automotive Intercooler for Turbo/Super-charged Engines

This intercooler efficiently cools compressed air from turbochargers or superchargers, increasing air density for enhanced engine performance. Its robust construction ensures durability and optimal heat dissipation under demanding driving conditions.

Product Overview

High-Performance Automotive Intercooler

This high-performance intercooler is engineered to efficiently cool compressed air from turbochargers or superchargers before it enters the engine. By increasing air density, it helps improve overall engine horsepower and torque while reducing the risk of detonation. Built for durability and reliable operation, this unit is designed for a direct-fit installation, making it an ideal choice for upgrading or replacing existing cooling components.

Compatibility

Compatible Vehicle	AUDI A4/S4 2.7TDI
Model Year	2007

Technical Specifications

Core Dimensions	665 x 142.7 mm
Water Tank Dimensions	75.5/75.5 x 145.8 mm
Nissens Reference	56202

Performance Features

Key Benefits	Increased Horsepower, Improved Air Density, Direct-Fit Installation, High-Density Fins
