

Automotive Jump Starter and Battery Charger

This is a multi-function DC power source for jump-starting vehicles. It can also be used for charging batteries.

Overview

Professional Multi-Function DC Power Source

This rapid auto start battery charger is a versatile solution designed for demanding automotive applications. It serves as a high-performance jump starter and battery charger, offering variable charging rates to accommodate different power needs. Engineered for professional use, the unit features a durable construction equipped with an ammeter and integrated circuit breakers for reliable operation.

Performance

Charging Capability

900 S

Model Series

Primary Functions

Jump Starting, Battery Charging, DC Power Supply

Safety & Monitoring

Safety Features

- Overload protection
- Integrated circuit breakers
- Analog ammeter for real-time monitoring

Technical Specifications

Technical Details

Feature	Description
Charging Rates	Variable
Application	Automotive / Professional
Power Type	Multi-function DC
Build	Durable construction

Rapid Start Support

Yes
