

Automotive KD Export Packaging Service

Comprehensive service packages automotive KD exports, including sourcing, manufacturing, and logistics. Component delivery, packaging design, material procurement, and customs clearance are managed by a central logistics and packaging center.

Service Overview

Comprehensive Automotive KD Export Solutions

This service provides a full-cycle packaging and logistics solution for automotive Knock-Down (KD) exports. It integrates procurement, packaging design, and global supply chain management to ensure seamless component delivery from the main factory to overseas assembly plants. By handling everything from material sourcing to customs clearance and inland distribution, this service optimizes the entire export workflow for automotive manufacturers.

Service Scope

Core Service Capabilities

- External component procurement
- In-house component supply management
- Packaging design and material sourcing
- Customs clearance and documentation
- Inland transportation and warehousing
- Global sea freight logistics
- Returnable packaging equipment management
