

# Automotive Key Information Reader

This automotive key reader retrieves data stored on vehicle keys. It enables access to information for vehicle management and security purposes.

## Product Overview

### Professional Key Information Reader

This automotive key information reader streamlines the vehicle maintenance reception process by allowing technicians to quickly access critical service data without needing to enter the vehicle. By integrating directly with service management software, it enables faster service estimation and improved customer communication. The device supports modern chassis types and provides comprehensive service history and vehicle identification details.

## Key Features

### Key Benefits

- Standardized maintenance reception process
- Quick identification of vehicle data without entering the car
- Improved customer satisfaction through efficient service consultation
- Enhanced workshop reputation
- Multi-language support

## Technical Capabilities

### Data Capabilities

- 17-digit VIN identification
- Supports new vehicle chassis types (e.g., E65)
- Reads current kilometer data
- Accesses full vehicle service history
- Compatible with KSD man-hour systems
- Compatible with ETK parts software

## Package Contents
