

Automotive Laminated Windshield Glass

Automotive laminated windshield glass provides structural integrity and clear visibility. It is designed with durable laminated construction and integrated sensor mounts for advanced driver-assistance systems (ADAS).

Product Overview

Automotive Laminated Windshield

This automotive laminated windshield is engineered for superior structural integrity and driver safety. By utilizing a PVB interlayer between multiple layers of float glass, it ensures that fragments adhere to the interlayer upon impact, significantly reducing the risk of penetration into the cabin. Designed with precision, it supports advanced driver-assistance systems (ADAS) through integrated sensor mounts, ensuring both safety and technological compatibility.

Technical Specifications

Compliance Markings

- E11 43R-001347
- DOT 670 M65 AS1
- China Standard (Qualified)

Construction Type

Laminated Float Glass

Safety Features

Impact Resistant, Anti-Shatter, ADAS Sensor Compatible, High Visibility

Features

Design Elements

Blacked-out Perimeter • Integrated Sensor Mount • Distortion-free
