

Automotive Lamp Holder Plug-In Connector

Automotive lamp holder plug-in connectors are essential for establishing electrical connections in vehicles. These wiring harnesses connect lamps and other electrical components.

Product Overview

Automotive Lamp Holder Plug-In Connector

These automotive lamp holder plug-in connectors are engineered for reliable electrical connections in vehicle lighting systems. Featuring multi-colored wiring harnesses and various connector housing designs, they provide a versatile solution for integrating lamps and other essential electrical components. Their robust construction ensures compatibility across a wide range of automotive applications.

Technical Details

Available Configurations

- Multi-colored wiring
- Various connector housings

Connector Type	Plug-in
Primary Application	Automotive Lighting, Electrical Harnessing
