

Automotive Lead-Acid Battery 6-QA-135T

This automotive lead-acid battery provides reliable starting power. Its robust construction ensures long-lasting performance and consistent power delivery.

Product Overview

High-Performance Automotive Battery

The 6-QA-135T is a robust automotive lead-acid battery engineered to deliver reliable starting power and consistent performance. Designed for durability, it features corrosion-resistant terminals and enhanced safety construction to ensure longevity under various operating conditions. This unit is suitable for a wide range of vehicles requiring dependable, high-capacity power delivery.

Technical Specifications

Model Number	6-QA-135T
Battery Chemistry	Lead-Acid

Key Features

Performance Highlights

135 Ah
Capacity

Construction Features	Corrosion-resistant terminals, Enhanced safety design, Robust construction
