

Automotive Lead-Acid Battery Charger

This battery charger features a lightweight, portable design. It offers simple operation and maintenance for various battery charging applications.

Overview

Professional Automotive Battery Charger

The CB-30-1 is a robust battery charger engineered for automotive and general-purpose lead-acid battery applications. Featuring a modern, portable design, it offers simple operation and low maintenance requirements for professional environments. With selectable voltage and current settings, it provides the versatility needed for various charging tasks while ensuring safety through integrated overload protection.

Electrical Specifications

Rated Output Current

30 A

Max Current

20 A

Standard Current

| | |
|---------------------|-------------|
| Rated Input Voltage | 230V ~ 50Hz |
| Output Voltage | 12V, 24V |

Performance & Compatibility

Compatible Battery Types

Lead-Acid

| | |
|----------------------------|-----------|
| Supported Battery Capacity | 50-500 Ah |
|----------------------------|-----------|

Design & Safety

Safety Features

- Overload protection
- Integrated ammeter for charge monitoring

Design Benefits

- Lightweight and portable
- Simple operation
- Low maintenance

| | |
|--------------------|------|
| Ingress Protection | IP23 |
