Product Overview

Professional Grade Automotive U-Bolt

This high-strength U-bolt is engineered to secure leaf springs to axles within heavy-duty automotive suspension systems. Constructed from premium-grade steel, it provides structural stability to the vehicle chassis and frame. The component features a specialized blue coating to enhance corrosion resistance and ensure long-term durability in demanding operating conditions.

Technical Specifications

Material	Steel
Net Weight	4.2 Kg
Primary Function	Stabilize car chassis and frame
Key Features	Corrosion Resistant, High-Strength Steel, Threaded Fastening

Part Identifiers

Reference Part Numbers

- A122.100.666
- 66A.227.320
