Overview

High-Performance Automotive Headlight Assembly

This premium automotive headlight assembly is engineered for superior visibility and durability, featuring advanced LED technology for optimal illumination in diverse driving conditions. Designed with high-impact resistant polycarbonate lenses and corrosion-resistant housing, this unit ensures long-lasting performance and reliability. The assembly integrates daytime running lights (DRL) and turn signal indicators, combining safety with a sleek, modern aesthetic.

Lighting Performance

Integrated Lighting Features

Advanced LED Technology, Integrated Daytime Running Lights (DRL), Integrated Turn Signal Indicators

Construction & Materials

Material Specifications

Component	Material/Property
Lens	High-Impact Resistant Polycarbonate
Housing	Lightweight, Corrosion-Resistant
Reflector	Optimized for Light Output & Beam Control

Compliance & Quality

Quality Assurance

Rigorously Tested • Safety Standard Compliant • Performance Verified
