

Automotive LED Miniature Bulb

This miniature LED bulb is designed for various automotive lighting applications. It features a compact design with dual LED emitters for enhanced brightness and visibility.

Product Overview

High-Efficiency Automotive Lighting

This miniature LED bulb is engineered for diverse automotive lighting applications, providing a reliable and long-lasting alternative to traditional incandescent bulbs. Featuring a compact form factor with dual LED emitters, it delivers enhanced brightness and visibility for critical vehicle systems. Its durable construction ensures resilience against vibration, making it an ideal choice for demanding automotive environments.

Technical Specifications

Design Features

- Compact design
- Dual LED emitters
- Vibration resistant construction

Common Applications

Instrument Panels, Dome Lights, Side Marker Lights

Installation & Performance

Installation Requirement

Polarity Sensitive

Key Performance Benefits

1 Low

Power Consumption

1 Extended

Lifespan
