

Automotive Mechanical Fuel Pump

This mechanical fuel pump is designed for automotive applications. It provides reliable fuel delivery for optimal engine performance.

Product Overview

Reliable Mechanical Fuel Delivery

This automotive mechanical fuel pump is engineered to provide consistent and reliable fuel flow for optimal engine performance. Featuring a durable metallic construction and a high-quality diaphragm-based pumping mechanism, it is designed to withstand the rigors of automotive applications. It is compatible with a wide range of engine types, making it a versatile choice for professional automotive repair and maintenance needs.

Technical Specifications

Fuel Connections

- Inlet port
- Outlet port

Construction Material	Metallic
Pumping Mechanism	Diaphragm-based

Compatibility

Engine Compatibility	Automotive, Various engine types
----------------------	----------------------------------
