

Automotive Mesh Window Shade

This automotive window shade is constructed from nylon mesh to block sunlight and reduce glare. Measuring 44*38CM, the shade is designed for easy installation and removal in most vehicles.

Product Overview

Professional Grade Automotive Sun Protection

This automotive mesh window shade is designed to provide effective protection against harmful UV rays and intense sunlight. Crafted from high-quality 55g/M2 polyester mesh, it offers a perfect balance between heat reduction and visibility. Ideal for both side and rear windows, this shade is a practical solution for enhancing passenger comfort and privacy during vehicle operation.

Technical Specifications
