

Automotive Mileage Correction Tool

This tool is applicable to most vehicles manufactured before 2006. It automatically reads and adjusts mileage directly, eliminating the need for manual calculations, and it can also function as a programmer.

Overview

Professional Mileage Correction Solution

The Mileage Master PC is a specialized diagnostic tool designed for automotive professionals to read, display, edit, and adjust mileage data directly within vehicle ECUs. It eliminates the need for complex manual calculations by automating the readout and adjustment process. This versatile device functions as both a programmer and a correction tool, supporting a wide array of vehicle makes and models manufactured up to 2006.
