

Automotive Multi-Component Speaker System

This system includes a mid-range speaker with a blue cone, a tweeter with a mounting bracket, and a crossover unit. These components are designed to work together to deliver a full range of sound in an automotive environment.

Product Overview

Professional Audio Component System

This multi-component speaker system is engineered for high-fidelity audio reproduction in automotive environments. The set includes a balanced combination of a mid-range driver, a coaxial speaker, a dedicated tweeter, and a precision crossover unit. Designed for seamless integration, this system ensures a full-range sound experience with clear highs and robust mid-tones.
