

Automotive Navigation System with Speedometer and Safety Alerts

This advanced car navigation system features a real-time speedometer and integrated safety alert system. The device indicates distance to potential hazards and provides directional assistance.

Product Overview

Advanced Automotive Navigation & Safety System

This comprehensive automotive navigation system is designed to enhance driver safety and situational awareness. It features a real-time speedometer, integrated safety alert systems, and customizable camera settings to assist with navigation and hazard detection. The intuitive interface provides essential driving data, including directional assistance and distance-to-hazard metrics, making it a reliable tool for professional and commercial driving environments.

Technical Specifications

Speed Unit	km/h
Speed Display	108 km/h
Hazard Warning Distance	300 m

Features

Interface Capabilities

- Real-time Speedometer
- Navigation Controls
- Date Display
- Battery Status Indicator
- Destination Search

Safety & Alerting

Traffic Safety Alert System, Hazard Detection, Customizable Camera Settings, Directional Assistance
