

Automotive Needle Roller Bearing

Automotive needle roller bearing R1559TV is designed for demanding applications. The 6408 bearing ensures smooth and reliable performance in automotive systems.

Product Overview

High-Performance Automotive Needle Roller Bearings

These precision-engineered needle roller bearings are designed specifically for demanding automotive applications. They ensure smooth, reliable performance in complex mechanical systems by providing optimal load distribution and enhanced durability. Engineered for high efficiency, these components contribute to an extended service life for critical automotive parts.

Technical Specifications

Supported Part Numbers

- R1559TV
- R1563TAV
- R1561TAV
- R1535TAV
- R1558TAV
- 6408
- 5707
- 6410
- F45087
- F45084
- JH14070
- FC66263
- DB67309
- DB59722

Primary Application

Automotive Systems, Needle Roller Bearings
