Product Overview

High-Efficiency Automotive Oil Cooler

This automotive oil cooler is designed to provide optimal heat transfer through a robust, durable construction. Engineered to withstand high pressures and temperatures, it effectively prevents engine overheating and helps extend overall engine life. This component is suitable for a wide range of vehicles and heavy-duty applications, ensuring reliable performance in demanding conditions.

Technical Specifications

Certifications

ISO/TS16949

OE Reference Numbers

17227505826, 17221436258

Color

Silver
